

Carter's Compost Neighborhood Hubs

Join Fellow Compost
Champions to Divert Food
Scraps from Landfills

EASY

IMPACTFUL

Why Compost?

Landfills are the 3rd largest source of methane emissions in the US (a greenhouse gas that's 25x more powerful than CO2 from our cars). Food causes nearly 60% of these landfill methane emissions.*

One Neighborhood Hub can divert over 1,500 pounds of food scraps per year!

*Source: NRDC.org

What is a Hub?

A Hub is a common collection site, located near your house, for you and 5-10 neighbors to divert your household food scraps. Save money by joining or starting a Hub and help keep our region clean and beautiful.

The Details:

- Weekly pickups
- 5-10 Member Households per Hub
- Hub Host is free with 6 Members subscribed to the Hub
- \$12 per Member per month
- 1 bag of finished compost included per Member every 6 months
